# USING YOUR FLAME BOSS® WIFI THERMOMETER

Flame Boss WiFi enabled devices will automatically install updated firmware when connected to the Internet. To find an updated manual that might include new features, click the Manuals link in the mobile apps or go to [www.flameboss.com/manuals](http://www.flameboss.com/manuals).

## DISPLAY

The LCD home screen shows individual temperatures or up to 4 temperatures in rotation, battery life, WiFi connectivity strength, and connectivity mode.

### LCD Home Screen

ST / AP

#### ST or AP

Indicates which mode the device is in (Station/Access Point).

#### WiFi Signal Strength

Individual arcs in WiFi symbol indicates connection strength.

AP

#### AP Indicator

Thermometer is in Access Point mode. If the AP indicator is solid, the thermometer is connected to your mobile device.

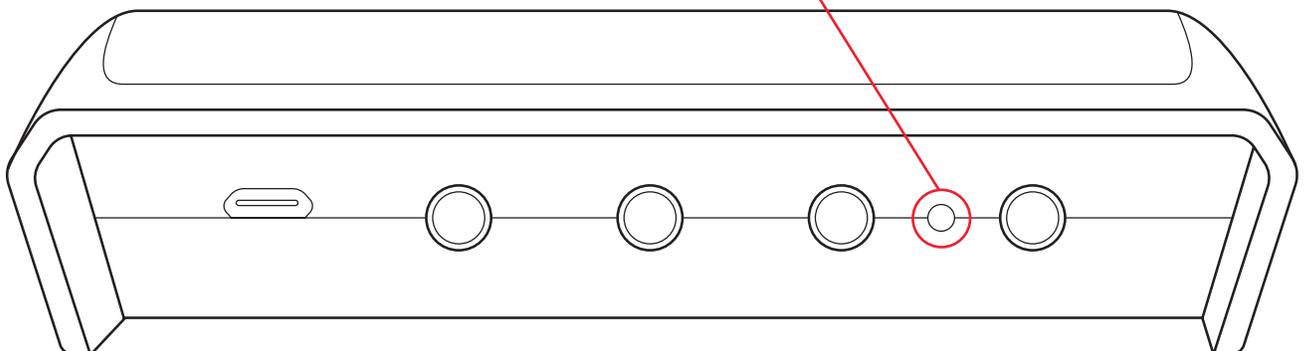

ST

#### ST Indicator

Thermometer is in Station mode. If the ST indicator is flashing, the thermometer is trying to connect to your WiFi network and Flame Boss server. If the ST indicator is solid, the thermometer is online and connected to the Flame Boss server.

**Note:** Pressing and releasing the Setup button will switch the thermometer between Station and Access Point modes.

Pressing and holding the Setup button for at least 5 seconds will factory reset the thermometer.

### F & C

Indicates Fahrenheit or Centigrade operation on the display. To change the temperature scale, click the Temp Scale button under the thermometer ID on the Controllers tab of the mobile app.

### Probe Identifier

Indicates which temperature jacks are in use (by number). A circle around the probe number will appear when that temperature is displayed.

### Lightning Bolt

Indicates that external power is connected/charging. Flashing → Charging | Solid → Fully Charged

## FUNCTION

### Power Button

Pressing the Power button turns thermometer on.

Pressing and holding the Power button for 3 seconds turns thermometer off.

Device is battery operated, but may be used while charging.

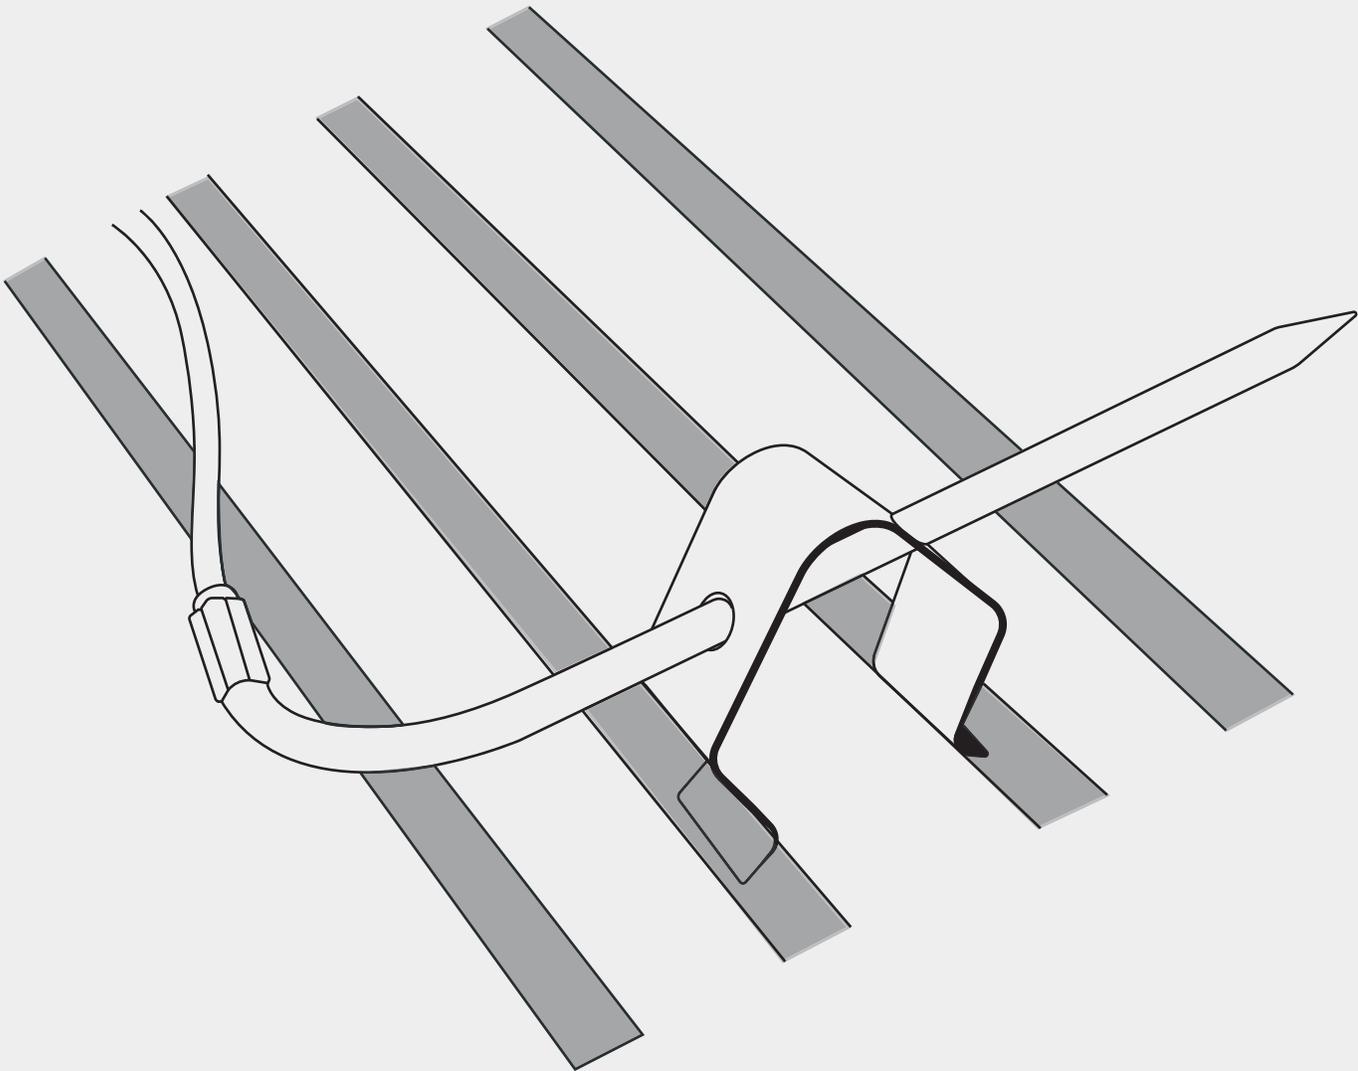

### Select Button & Backlight

Pressing the Select button while the backlight is off will turn the backlight on for 30 seconds. If the backlight is on, pressing the Select button will manually rotate through the temperature readings if multiple probes are in use. The backlight will remain on when the thermometer is connected to the USB charger. By default, the temperature readings will change to the next probe every 3 seconds. Pressing and holding the Select button for at least 3 seconds will pause the display to hold on the current probe. To resume auto-rotating, press and hold the Select button for another 3 seconds.

# PROBE PLACEMENT – COOKING GRATE

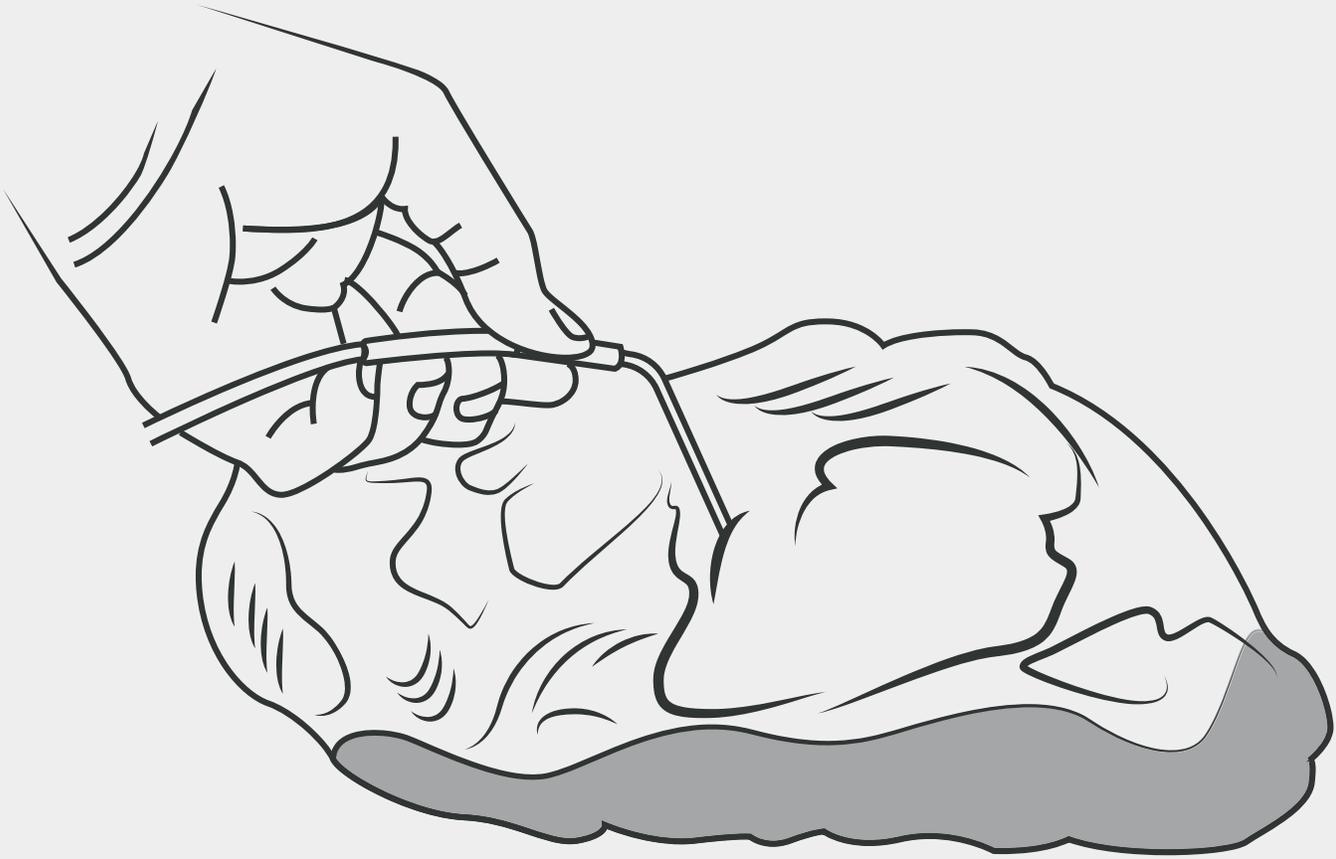

Using the combination of the grate clip and probe, clip the probe into place in between grate.

---

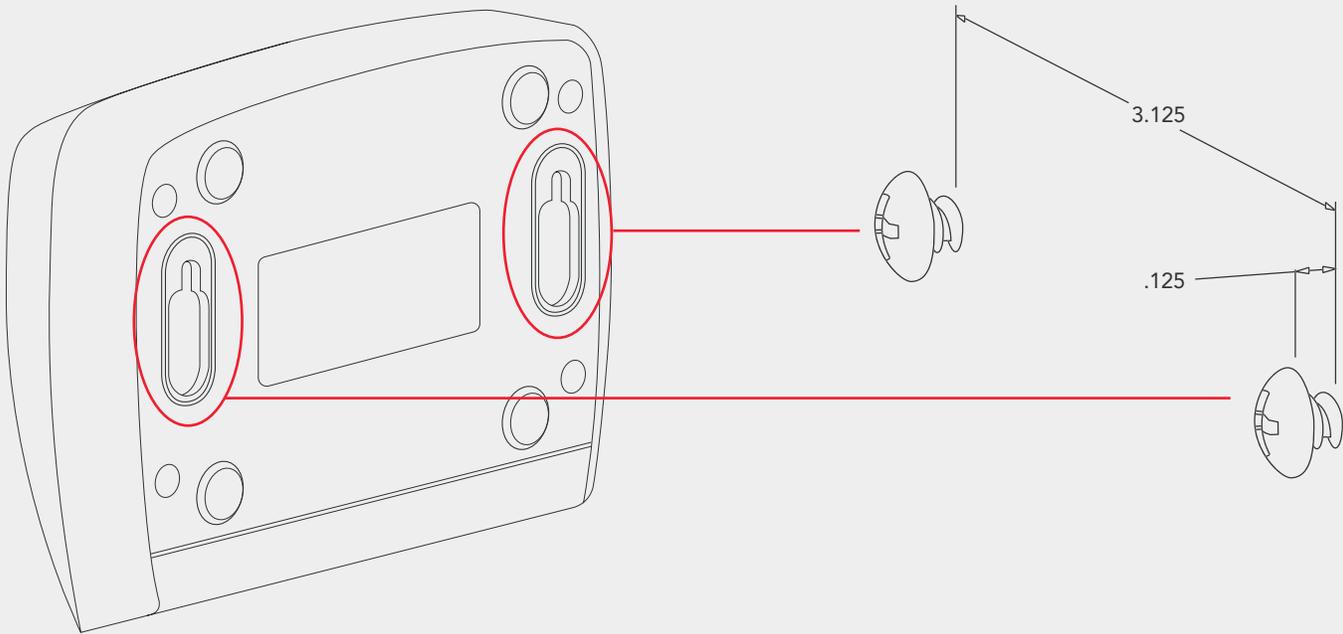

## PROBE PLACEMENT – FOOD PROBE

Insert multipurpose probe into the thickest part of the meat avoiding any bone.

## WALL MOUNTING (OPTIONAL)

The Flame Boss Thermometer may be hung on a vertical surface using two (2) #8 panhead screws spaced 3 1/8" apart. The screw heads must remain a minimum of 1/8" off the surface.
